

Pedestal tip-up seating by JG

Bucks County Courthouse, Doylestown, Pa. Architects, Carroll, Grisdale & Van Alen

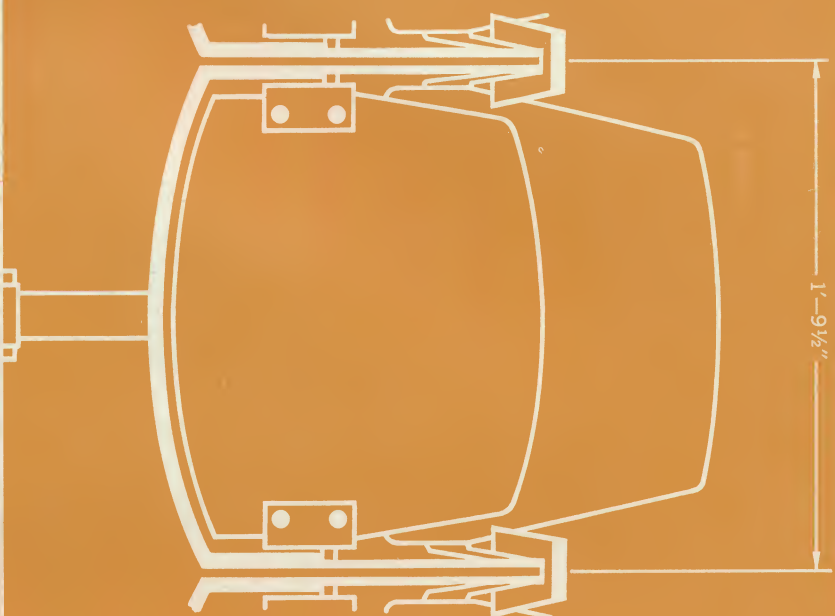

The gentlest fingertip touch floats this seat down to sitting position. There's no resistance. Vacated, it returns lightly to the upright . . . no costly, complicated spring-seat mechanism fights back.

The exclusive counterbalance action produces great compactness. Cantilevered linear design, the essence of the Contemporary, utilizes space to its maximum, gives extra knee and leg room. No back legs interfere with walk-through areas.

Specify this all comfort JG tip-up seat for every multiple seating application. It is ideal for curved or serpentine arrangements and is made in a variety of finishes and materials.

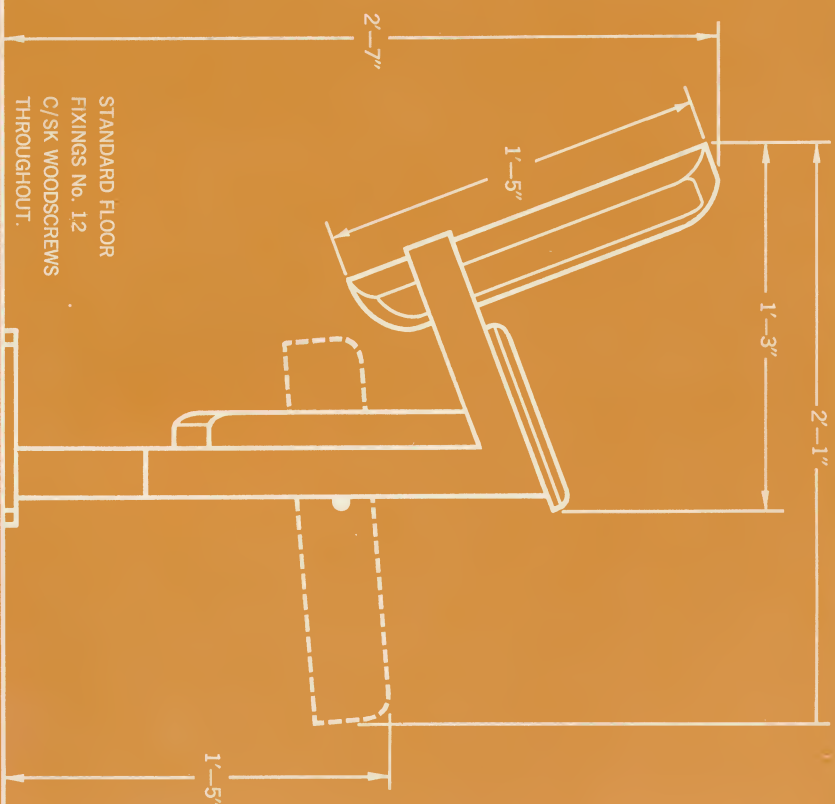

Its economy is impressive.
